

NOTA VITRUM

Glass & Co has been serving many of the top dining and Michelin starred restaurants in London and in the UK for over six years. Our manufacturing facilities in Austria, produce some of the best lead free Crystal Wine Glasses in the industry.

*Our **Serving** line includes three tall and elegant **Wine Decanters** specially designed to aerate the wine and to allow it to breathe. This stimulates the movement of molecules in the wine to trigger the release of more aroma compounds and also benefits the wine by smoothing if any harsher aspects.*

The capacity, base diameter and height of our wine decanters allows to perfectly mimic the effects of swirling the wine in a glass. Decanting wine is beneficial with very tannic wines like Bordeaux wines, Cabernet Sauvignons, Barolos, Ports, and wines of Rhône.

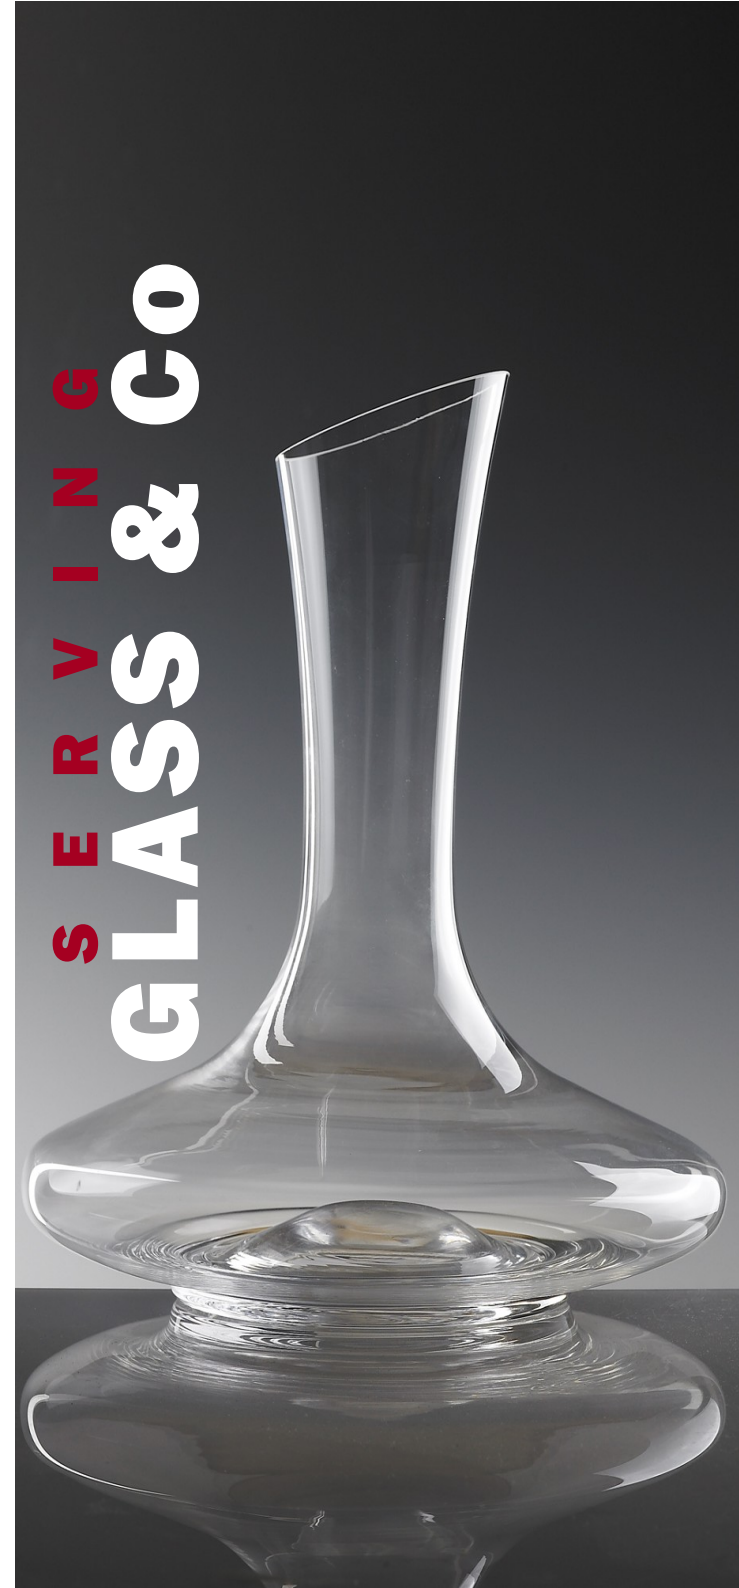

Should you need any further information or require samples and prices, please contact our Customer Services on 020 7539 3732 and we will be delighted to help you.
